DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The instantly claimed method for the replacement of a deuterium atom for a hydrogen in an alkyl-substituted alkyl group is neither disclosed nor fairly suggested by the closest art of record: Hirota et al (Bulletin of the Chemical Society of Japan, Differences in the Catalytic Activity of Nickel, Platinum and Palladium as Observed in the Isotopic Exchange Reaction of Paraxylene with Deuterium Oxide, 1962, 35, pages 228-232) and Rylander (Hydrogenation Methods, 985, Academic Press, Inc., Orlando, Florida, page 4). Upon further consideration, the Examiner finds that Hirota neither discloses nor fairly suggests the use of an *activated* palladium catalyst. Rylander teaches nothing to cure this deficiency. The instantly claimed method is therefore patentable over the teachings of Hirota and Rylander, the closest prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
